THE MESOCOSMOS AND BIOLOGICAL ARCHITECTURE.

12.15- Peyre Grid

The Peyre lines deflect with the Gold metal and just like the Palm lines form a grid and they are walls of electromagnetic energy emanating from the subsoil that extends vertically up to a height of 2,000 meters, they are everywhere, both on flat land and in the mountain, in the water, outside and inside the houses. They are oriented according to the geomagnetic poles. Its intensity and density are very variable, depending on innumerable factors such as the time of day and atmospheric changes.
