THE MESOCOSMOS AND BIOLOGICAL ARCHITECTURE.

2.17- Wissmann Grid

The Wissmann lines deflect with the Aluminum metal and just as the Curry lines form a grid and are walls of electromagnetic energy emanating from the subsoil and extending vertically up to a height of 2,000 meters, they are everywhere, both on flat land and in the mountains, on the water, on the outside and inside the homes. They are oriented according to the geomagnetic poles. Its intensity and density are very variable, depending on innumerable factors such as the time of day and atmospheric changes.
