GEOMETRIC ANALYSIS OF PROJECTS CARRIED OUT BY MICHAEL RICE

6.20- Spiral Projects

This design is the juxtaposition of a radiated circle with a vesica expression. The house harvests light and heat, both very necessary in temperate climates.

The project design was originally created for a well-established community of healing practitioners living in Western Ireland. The concept is very beautiful; using the mirror effect of two golden spirals to generate power in the space it concentrates, and also to delineate the two arms of the construction, essentially giving a sense to the building to embrace not only the Sun, but all the people who are going to come and use this space. Remember that in Ireland, finding and celebrating the Sun is an art, since we do not see it much!
